Suhani Gupta

Full-Stack Developer | Java, Spring Boot, React

Bhopal, Madhya Pradesh, India

8770562841 | suhanigupta2304@gmail.com | Portfolio | LinkedIn | GitHub | LeetCode

Summary

Final-year CSE student at IIIT Kota, focused on full-stack development using Java, Spring Boot, and React. Worked on real-time and AI-integrated applications through projects and hackathons, with additional experience in open-source development. Strong foundation in DSA and problem-solving, with an emphasis on backend and full-stack engineering.

Education

Indian Institute of Information Technology, Kota | B.Tech, Computer Science and Engineering *2023 – 2027*

Experience

Open Source Contributor | GirlScript Summer of Code *May 2024 - Aug 2024*

- Implemented React Context API-based global state management for the Moksh repository and resolved responsive UI and component lifecycle issues across open-source projects using React and custom hooks.
- Ranked in the top 11% (Top 160 of 1,500+ contributors) through Git-based collaboration, maintainer-reviewed pull requests, bug fixes, and feature contributions across multiple repositories.

Projects

1. SketchRoom : Real-Time Collaborative Whiteboard *Live Link*

Tech Stack: Spring Boot, React, WebSocket (STOMP), Redis, PostgreSQL, TypeScript, Docker

- Built a real-time collaborative whiteboard using WebSockets and STOMP, enabling synchronized multi-user drawing, shared undo/redo, late-join canvas replay, and reconnect recovery.
- Optimized drawing-event persistence by batching up to 32 segments per Redis write, reducing Redis write operations by up to 96.9% per full batch while preserving server-assigned event ordering.
- Designed a Redis-backed event pipeline with 30-second PostgreSQL checkpoints, implementing duplicate suppression, sequence-gap recovery, and failure handling for state recovery and persistence.

2. InTune : AI-Roommate Matching Platform *Live Link*

Tech Stack: React, TypeScript, Spring Boot, MongoDB, FastAPI, Sentence Transformers, Tesseract.js, Web Speech API

- Developed a semantic roommate-matching pipeline using FastAPI and Sentence Transformers (all-MiniLM-L6-v2), with persisted embeddings, cosine similarity, top-10 candidate ranking, and Jaccard fallback.
- Added voice-based onboarding using the Web Speech API and OmniDimension, alongside Tesseract.js document OCR and backend Verhoeff checksum verification.
- Implemented Spring Boot REST APIs with JWT/BCrypt authentication, MongoDB persistence, backend-enforced chat and expense authorization, rate limiting, and authenticated webhooks.

3. Saarthi : AI Women's Health & Telehealth Platform *Live Link*

Tech Stack: Spring Boot, React, PostgreSQL, JWT, WebRTC, Stripe, Gemini API, Resilience4j, Geoapify

- Developed a full-stack healthcare platform with JWT-secured Spring Boot APIs, PostgreSQL persistence, health tracking, appointment booking, and AI-assisted symptom guidance.
- Tested concurrency-safe appointment booking and idempotent Stripe payments processing using database constraints, signed webhooks, and transactional reconciliation; validated 20 simultaneous bookings with only one success.
- Integrated Gemini with structured response validation, HTTP timeouts, and Resilience4j circuit breaking; verified 3 short-circuited calls across 7 test requests, with fallback and recovery behavior.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python
Frontend Technologies: React, Tailwind CSS, HTML, CSS
Backend Technologies: Spring Boot, REST APIs, WebSocket
Databases & Caching: MongoDB, PostgreSQL, Redis, MySQL
Tools & Platforms: Docker, Vercel, Render, Git
Relevant Coursework: Data Structures & Algorithms, Machine Learning, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Hackathons & Achievements

- **Flipkart GRiD 8.0 (2026):** Advanced to Round 3 (Semifinalist) of Flipkart's national engineering challenge.
- **SheBuilds Hackathon 2025:** National Finalist (Top 1%, 1,500+ entries). Created InTune, an AI-powered roommate matching platform with OCR-based identity verification and compatibility scoring.
- **HackOrbit Hackathon 2025:** Open Innovation Track Winner (1st Place) & Top-10 Finalist of 1,000+ teams. Delivered Saarthi, an AI-powered women's health platform with Gemini integration.
- **Google Girl Hackathon 2025:** Stage 2 (Top 300 of 5,000+ participants). Selected in the Software Engineering Track for an AI-integrated full-stack solution ideathon.
- **Competitive Programming:** Solved 500+ problems across LeetCode (Rating: 1723), GeeksforGeeks, and CodeChef (**3** ⋆)
