Education

Degree/Certificate	Institute	GPA/%	Year
B.Tech(CSE)	Indian Institute of Information Technology, Kota	7.01	2023 – 2027
Class XII	Sagar Public School, Bhopal	88.88%	2022
Class X	Sagar Public School, Bhopal	95.2%	2020

Projects

1. SketchRoom : Real-Time Collaborative Whiteboard

[Live Link](#)

Tech Stack: Spring Boot, React, WebSocket (STOMP), Redis, PostgreSQL, TypeScript, Docker

- Built a collaborative whiteboard with Spring Boot WebSocket (STOMP) enabling live multi-user drawing sync across shared rooms with sub-100ms latency.
- Implemented Redis write-behind caching to buffer high-frequency draw events and batch-flush to PostgreSQL every 30s, reducing DB writes by 98%.
- Dockerized with multi-stage builds; deployed on Railway (backend + PostgreSQL + Redis) and Vercel (frontend).

2. InTune : AI Roommate Matching Platform

[Live Link](#)

Tech Stack: React, Node.js, TypeScript, Python, MongoDB, EasyOCR, Tailwind CSS, Firestore

- Roommate matching platform pairing users by lifestyle compatibility; built React frontend, Node.js API routes, and EasyOCR-based identity verification.
- Implemented SBERT-based cosine similarity algorithm for compatibility scoring across preference parameters.
- Integrated MongoDB for user profile storage and Firestore for real-time match state, keeping read-heavy compatibility queries fast without relational joins.

3. CareerCopilot : AI Job Application Tracker

[Live Link](#)

Tech Stack: Spring Boot, React, JavaScript, PostgreSQL, JWT, OpenAI API

- CareerCopilot is a job application tracker that lets users manage applications and get AI-based resume-to-JD compatibility scores;
- Built REST APIs with Spring Boot and JWT-based authentication for secure multi-user access.
- Integrated OpenAI GPT-3.5 API to match resume against job descriptions and generate a compatibility score.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, C

Frontend Technologies: React, Tailwind CSS

Backend Technologies: Spring Boot, REST APIs, WebSocket

Databases & Caching: MongoDB, PostgreSQL, Redis, Firebase, MySQL

Tools & Platforms: Docker, Vercel, Railway

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Hackathons & Achievements

- **SheBuilds Hackathon 2025:** National Finalist (Top 1%, 1,500+ entries) Built InTune, an AI roommate matching platform with OCR-based identity verification and a Python compatibility algorithm.
- **HackOrbit Hackathon 2025:** Top 10 Finalist (1,000+ teams) Built **Saarthi**, a full-stack AI health platform with OpenAI GPT integration; placed among top teams in the final round.
- **Google Girl Hackathon 2025:** Stage 2 Selection (Top 300, 5,000+ participants) Selected in the Software Engineering Track for an AI-integrated full-stack solution.
- **GirlScript Summer of Code 2024:** Top Contributor (Top 160, 1,500+ contributors) Open-source contributions in React.js and JavaScript across multiple repositories.
- **Competitive Programming:** Solved 400+ problems across LeetCode, GeeksforGeeks, and CodeChef (2 ★); consistently practicing Data Structures and Algorithms.
